EDUCATION

Daffodil International University

Bachelor of Science in Computer Science and Engineering (CSE)

Savar, Dhaka, Bangladesh

Expected Passing Year: 2027

- **Current CGPA:** 3.12 out of 4.00 (Completed 117 credits through Spring 2026)
- **Academic Focus:** Core concentration in AI Engineering, Large Language Model Optimization, and Compiler Design.

Kapasgola City Corporation Mohila College

Higher Secondary Certificate (HSC), Science Group

Chittagong, Bangladesh

Passing Year: 2023

- **Result:** GPA 4.44 out of 5.00

PDB High School

Secondary School Certificate (SSC), Science Group

Chittagong, Bangladesh

Passing Year: 2020

- **Result:** GPA 4.89 out of 5.00

LEADERSHIP & MENTORING EXPERIENCE

UCB Fintech Company Limited (UPAY)

UPAY Campus Ambassador / Student Cohort Lead

Dhaka, Bangladesh

January 2026 - Present

- **Student Mentoring & Teamwork:** Mentored an 11-member peer cohort during an intensive academic field study to UPAY's corporate headquarters, successfully standardizing group assignments and aligning project timelines.
- **Institutional Logistics:** Acted as the primary strategic contact bridging student tracks, department faculty, and the DIU Career Development Center (CDC) to secure formal corporate clearances, schedules, and transportation infrastructure.
- **Peer Guidance & Outreach:** Spearheaded on-ground operations at **DIU Job Utsob 2025**, advising hundreds of students on corporate presentation strategies and networking protocols while serving as an active university representative.
- **Recognition:** Awarded formal institutional certification by UPAY management for excellence in public communication, peer mentoring, and operational leadership.

FEATURED PROJECTS

Linkiee (AI LinkedIn Content Generator)

Python, Hugging Face, Gradio

- **AI Engineering:** Fine-tuned and deployed a specialized content generation tool utilizing Small Language Models, combining TinyLlama-1.1B (English) and mGPT (Bengali) architectures across a curated training set of 500+ custom samples.
- **AI in Education:** Built this application to demonstrate cost-efficient AI deployment by optimizing parameters to process localized model inference natively on standard consumer-grade CPUs without requiring premium cloud hardware accelerators.
- **Content Development:** Engineered a highly interactive user application interface via Gradio, rendering abstract generative AI workflows completely transparent and user-friendly for creators.

Kotha0.2 (Banglish Language Compiler Architecture)

C, Flex, Bison

- **Educational Technology Integration:** Conceived, designed, and compiled a custom open-source programming language utilizing intuitive Banglish keywords (e.g., 'purno int') explicitly engineered to simplify computer science syntax barriers for native Bangladeshi students.
- **Technical Implementation:** Engineered the custom compilation pipeline from scratch - utilizing Flex for token segmentation, Bison for grammar compilation trees, and successfully deployed 12 built-in data type conversions.
- **Pedagogical Utility:** Completed the framework with a register-focused custom Virtual Machine environment alongside an interactive web-based playground IDE with custom syntax highlighting to serve as a robust classroom platform.

TingoBingo (Social Media Platform for Pet Owners)

React, Next.js, Tailwind CSS

- **Content Development:** Programmed a rich full-stack interactive web platform dedicated to pet owners, incorporating complex interface styling layers and cohesive responsive layout specifications.
- **Technical Execution:** Engineered full profile persistence handlers, reactive database state synchronization channels, and real-time interactive feed cycles to ensure immediate client-side feedback.

- **UI Architecture:** Managed a pixel-perfect front-end configuration utilizing a custom Tailwind CSS layout blueprint, ensuring complete consistency across all variations of mobile and desktop viewports.

TECHNICAL & PEDAGOGICAL SKILLS

- **AI Engineering & Applied ML:** LLM Parameter Fine-Tuning (TinyLlama/mGPT), Hugging Face Transformers Library, Model Deployment on Resource-Constrained Hardware, Inference Latency Optimization, Gradio Application Interfaces.
- **Compiler Design & Applied Logic:** Lexical Scanning Engine Design (Flex), Syntactic Validation & Grammar Parsing (Bison), Abstract Syntax Trees (AST), Virtual Machine (VM) Environments, Register Architecture Simulation.
- **Full-Stack Web Architectures:** Next.js (App Router Pipeline), React Components, FastAPI, Serverless Backend Gateways (Supabase/Appwrite), Responsive Interface Layouts (Tailwind CSS), Relational DBMS (MySQL).
- **Educational Tools & Content Development:** Programming Syntax Localization, Interactive Playground Design, Technical Report Writing, Structural Documentation, Educational Software Engineering.
- **Teamwork & Operations:** Cross-Functional Project Management, Corporate-Academic Liaison, Peer Group Mentorship, Git Version Control, LaTeX Document Compilation.
